

PROFESSIONAL SUMMARY

Full Stack Developer passionate about solving problems and building user-focused solutions. I enjoy being challenged, taking ownership of my work and continuously learning.

SKILLS

Tools & Software: Node.js, Next.js, React, Docker, Git, Git Actions, PM2, Linux, Jest, Nginx, ELK Stack, AWS Cloud, MySQL, Postgres, Redis, NoSQL, CI/CD, REST, Microservices

Programming Languages: TypeScript / JavaScript, SQL

Core Competencies: Agile Methodology, Software Development Lifecycle (SDLC), Continuous Integration (CI) / Continuous Delivery (CD), Object-Oriented Design (OOP), Design Patterns, Industry Best Practices, Test Driven Development, Technical Ownership, Communication, Proactiveness, Collaboration / Team Player, Adaptability, Autonomy, Innovation, Microservices Architecture, RESTful APIs, Application Security

EXPERIENCE

Full Stack Developer	SafariOne	February 2023 - Present
- Independently proposed and executed a TypeScript migration for a backend Node.js service to improve code quality in terms of maintainability and reliability. Gained buy-in from product leadership and successfully reduced runtime error rates by 50%. (NodeJS, Typescript) - Owned development of portals under high pressure deadlines for a major new client, Hamilton Telecom. Owned design and implementation of business flows end-to-end. Resulting in SafariOne successfully acquiring the client for a multi-year contract. (NextJS, NodeJS) - Refactored and rebuilt backend and portal systems to resolve known vulnerabilities and align with secure coding standards. Worked independently and delivered audit-ready systems that passed reviews by third-party cybersecurity firms, allowing the company to meet licensing requirements for deployment. (NextJS, NodeJS) - Collaboratively designed and developed a licensing mechanism in the SafariOne BizFlow product that introduced fine-grained feature segmentation, enabling the company to shift from flat-rate pricing to feature-based billing. This improved monetization strategy directly boosted company profits and allowed the company to better align offerings with client needs. - Acted as primary Level 3 support contact for clients, engaging directly to troubleshoot and resolve critical issues. Maintained 100% SLA compliance across all escalated client issues by providing fixes under 24 hours. - Implemented a CI/CD pipeline with automated test case execution, reducing production errors by 40% and significantly improving release reliability and deployment speed. Ensuring a smooth experience for our clients.		

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science	COMSATS University Islamabad
Complete NodeJS Developer (GraphQL, Nodejs, Typescript)	Udemy, 2024
